NOTE.—The above figures show the loss or gain by migration. Minus sign (—) indicates loss by migration.

(a) Troop movements have been excluded for the period September, 1939, to June, 1947.

(b) Owing to the difficulty of separating troop movements, records of interstate movements have been excluded from July, 1943, to June, 1947. The figures in respect of this period refer to overseas migration only.

† NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 32.

SUMMARY OF METEOROLOGICAL CONDITIONS, TASMANIA, 1950.

Over nearly all Tasmania, 1950 rainfall was below average, greatest deficiencies being on the West Coast and the Central Plateau, and in the Derwent Valley. On the West Coast, many yearly totals were the lowest ever recorded. The main feature of its seasonal distribution was the absence of good autumn and winter falls, resulting in the Central Plateau and West Coast having the driest Winter on record. In the South-eastern and Derwent Valley districts, rainfall in July at many stations was also the lowest on record. The prolonged dry period, starting well before 1950 opened, was broken by good general rains in October and early November, after which the dry spell continued. January and February experienced generally below normal mean temperatures, with above normal mean temperatures from September to December. An absence of wind and a long sequence of frosts were features of June weather.

One outcome of the dry year has been the small run-off in water storages, resulting, at the end of the year, in fairly general restrictions on the use of water and causing concern about the maintenance of present and future supplies of hydro-electric power. Other outcomes were the development of a high bush fire danger, as early as the last fortnight in November, associated with preceding good rains and a warm dry spring and early summer, and the ripening and harvesting of small fruit crops at least three weeks earlier than usual. In the North, but not elsewhere, there were adequate fodder reserves when winter began. When spring came there was heavy pasture growth in the North, but elsewhere little surplus was available for conservation. The 1949-50 crops of hops were harvested by mid April, and they were of good quality and normal quantity.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1949-50.

(Figures in parentheses are those for corresponding period of 1948-49.*)*

For statistical purposes, a factory is an industrial establishment which employs four or more persons, or in which power, other than hand is used. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1949-50, returns were collected from 1456 (1346) factories, an increase of 110 compared with the preceding year. The increase is a reflection of the continued extensive development in manufacturing industry taking place in this State. The total post-war increase in the number of factories now amounts to 450.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1949-50, 23,506 (22,602), showed an increase on the number for the previous year. For 1949-50 there were increases of 794 in the number of male workers and 110 in the number of female workers.

Some of the more important increases in total numbers of workers are shown in the following industries:—Engineering (not Marine or Electrical) 1,090 (814); metal extraction 2,676 (2,529); motor-body and carriage works 302 (245); furriers and fur dressing, woolscouring and fellmongery, tanning, currying, etc. 417 (284); bread, biscuits and confectionery, 1,595 (1,504); sawmills, plywood mills, 2,340 (2,226); joinery 601 (526); newspapers, printing and binding, paper making, 2,420 (2,219). Industries in which substantial declines in the total number of workers occurred are as follows:—Wool, worsted, etc., 2,406 (2,561); jam, canning, pickles, 1,334 (1,385); dried fruits and vegetables 60 (122); boxmaking 102 (147).

The following table gives a classification of factories according to the number of hands engaged for the years 1928-29, 1938-39, and 1947-48 to 1949-50:—

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods made or processed during the year, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes, the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light and water; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, no deduction is made for depreciation owing to the difficulty of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1945-46.	1946-47.	1947-48.	1948-49.	1949-50.

(*a*) Excludes amounts drawn by working proprietors.

The gross output for 1949-50 amounted to £45,080,000 (£36,657,000), and net production to £19,336,000 (£16,075,000). After deducting labour costs from net production, an "unallotted balance" of £9,689,000 (£7,618,000) remained from which other costs and overhead expenses, such as rent, interest, insurances, taxation, depreciation, profits, etc. are met. Net production, which gives the best indication of the activities of the factories of the State, was, during the late 1920's, valued at about £3,600,000. With the onset of the business depression, the value declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £19,336,000 during the year under review. For each £100 expended in salaries and wages, the average value of net production was £184 in 1945-46; £189 in 1946-47; £178 in 1947-48; £190 in 1948-49; and £200 in 1949-50. The aggregate cost of raw materials rose considerably during 1949-50, and amounted to £21,734,000 (£17,159,000), representing 48 (47) per cent of the total value of the output.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.

Heat, light, and power	219,362	170,001	201,924	553,800	602,071	623

As may be seen from the table, the value of net production in 1949-50 was greater than in the previous year in all of the above industries, the increase being particularly marked in woollen mills and the books, papermaking, printing, &c., industry.

LABOUR COSTS.

The total amount of wages and salaries (excluding amounts drawn by working proprietors) for the year 1949-50 was £9,646,259, compared with £8,456,406 in 1948-49. The average payment to all male and female workers (excluding working proprietors), for the year under review, was £428 (£390).

VALUE OF LAND AND BUILDINGS AND PLANT AND MACHINERY.

At the end of 1949-50 the value of land and buildings stood at £8,650,000 (£7,335,000) while plant and machinery was valued at £13,728,000 (£12,253,000).

In the table above the separate Commonwealth and State totals are not adjusted, but the combined totals are shown adjusted and also unadjusted.

The duplications excluded from the adjusted figures include the following items:—Tax re-imbursement, payments of interest under the Financial Agreement, Special Grants, and Price Control re-imbursement, Coal Strike Emergency Grant, and State payments of Pay-roll Tax to the Commonwealth. There are other duplications not allowed for—e.g., various payments from the Commonwealth to the States for the services rendered and miscellaneous Commonwealth receipts from the States, and the adjusted figures are, therefore, still slightly overstated.

For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability at at 30/6/50.

(*b*) Including periodic payments in reduction of principal.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1949.

Hobart, 12th October, 1950.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1949.

(Note.—Figures in parentheses refer to the previous year—1948.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, received copies of the printed report and tables for 1948, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1949 were furnished in accordance with the provisions of the Friendly Societies Act.

Societies.

At the end of the year 1949, there were 20 (20) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 7 (7), with a benefit membership of 24·8 (22·8) per cent of all societies. There were 13 (13) general societies with 145 (146) branches for males, 25 (25) for females, and 3 (3) for juveniles.

The decrease of 1 in the number of branches was due to the amalgamation of the United Brother and the Guiding Star Lodges of the I.O.R. district to form the United Tent Lodge.

Membership.

The total membership at 31st December, 1949, was 21,963 comprising 20,986 in adult male lodges, 915 in adult female lodges and 62 juveniles. Compared with the numbers recorded on the same date in 1948; this represents a decline of 694 members or the equivalent of 3·0 per cent and reflects a continuation of the downward movement which has been apparent for some years.

Details of the movement in membership are given in the table below for each year since 1944 when the last actuarial valuation was made.

Distribution of Members According to Age.

It is important to note the continued increase in the average age of members. The continuing decline in membership, particularly in the age groups 16-19 years and 20-29 years, has resulted in a drift into the older age groups as indicated in the table below. The membership included in this table is restricted to male members of general societies which form the most important section of total membership.

Actuarial Valuation of Friendly Societies.

The last actuarial valuation of the assets and liabilities of the Friendly Societies of the State was made at the 31st December, 1944. In accordance with the provisions of Section 14 I. (*e*) of the Friendly Societies Act 1888, a similar valuation is due at the end of 1949. Approval has been given to meet this requirement and Mr. O. Gawler, F.I.A., Government Statist for Victoria, has been appointed to carry out the valuation. It is expected that these results will be available for inclusion in the next report covering the year 1950.

In the meantime, recommendations as to the necessity for the introduction of amending legislation to the Friendly Societies Act are withheld pending the receipt of the actuary's report.

J. C. STEPHEN,
Government Statistician and Deputy Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.
